Behavioral Healthcare Hospital

DESERT PARKWAY
Behavioral Healthcare Hospital

**SPECIALIZED
NEEDS UNIT**

Our Specialized Needs Unit (SNU), located in our hospital, is specifically designed to meet the needs of children and adolescents diagnosed with Autism/Intellectual/Developmental Disabilities (A/I/DD) experiencing acute behavioral crises.

Our 30-45-day hospitalization provides wrap-around treatment to address acute behavioral issues which impede daily functioning. Our holistic approach incorporates a variety of therapies to identify individual needs and analyze varying areas of life that may contribute to these issues.

Using a combination of behavior analysis and specialized psychiatric care, our teams develop comprehensive treatment plans focused on successfully reintegrating patients back into the home and community.
